

APPENDIX C3: IPSC Separating Metal Plates

Target complete Front elevation

Target complete
Side elevation

Target Base (plan view)

Notes:

These targets offer precise and consistent resetting and are very reliable. They stand up to repeated shots.

The strike plates can be set on the bases vertically or horizontally.

Other sizes of strike plates will sit securely on these bases.

The bases can be nailed or bolted to timber or even to the ground (15cm nails) to secure in place.

The bases can be welded to steel or fixed to timber spikes to allow them to be set into the ground.

The targets can be made from a thicker material but 1cm is recommended as the minimum. The heavier the plate the less distance it will travel when hit.

If a hole is drilled in the strike plate a chain can be fitted to restrict the distance that the plate may travel when hit.

Various square or rectangular sizes are permitted providing between: 15cm x 15cm (minimum) and 45cm x 30cm (maximum). Preferred sizes are 15cm x 15cm, 20cm x 15cm and 25cm x 20cm.
