

10 REASONS FOR A RESHOOT
(Based on the IPSC Handgun Rulebook, January 2015 Edition)

Hi folks,

As there seems to be many incorrect reasons given in order to justify appeals for reshoots, the following list can be used as a useful quick-reference. However, this list does not, in any way, replace, override or supersede the current, official IPSC Handgun Rulebook.

1. MODIFICATIONS TO COURSE CONSTRUCTION (REVISED COURSE OF FIRE):

Depends on RM decision under 2.3

See Rule 2.3.3.1 or Rule 2.3.3.2

2. RANGE EQUIPMENT FAILURE:

Depends on RO decision under Rule 4.3.3.2 (metal plate)

Depends on RM decision under rule 4.6.2.2 (significantly different target presentation)

Reshoot is mandatory under:

Rule 4.6.2 (Range Equipment Failure)

Rule 9.1.5.2 (IPSC target shoot through)

Rule 9.1.6.2 (hard cover shoot-through onto metal target)

3. LOSS OF EYE OR EAR PROTECTION:

Mandatory if Rule 5.4.3 applies

4. SUSPECTED SQUIB INCORRECTLY CALLED (STOPPED BY THE RO):

Mandatory if Rule 5.7.6.2 applies

5. INCORRECT START POSITION:

Depends on RO decision (may be required) under Rule 8.2.2

6. INTERFERENCE:

Depends on RO decision under Rule 8.6.3 (or an Arbitration decision under Rule 11.6.2).

7. TARGET ISSUES:

Depends on RO decision

Rule 9.1.3 (Prematurely patched target preventing determination of actual score)

Rule 9.1.4 (Target not patched and RO is unable to determine an accurate score or penalty)

8. SCORESHEET ISSUES:

Depends on RM decision

Rule 9.7.5 (insufficient or excess entries, no recorded stage time)

Rule 9.7.6 also applies

9. FAULTY TIMER:

Depends on RO decision under Rule 9.10.1 (faulty timer)

Also depends on an Arbitration decision under Rule 9.10.2

10. IPSC POPPER CALIBRATION ISSUES:

See Appendix C1, Points 6(c), 6(d) and 7(b).
