

APPENDIX C3: IPSC Action Air Stop Plate

Important Construction Notes

The Stop Plate, if used, must be a circular target, not less than 15 centimeters diameter, securely anchored to the ground, not less than 2 meters from the most likely final shooting location in the COF.

The Stop Plate must be clearly distinguishable from regular plates and contain visual electronic indicators to confirm it has been hit, and it must be connected by wires or other means to a timer where the time of the final shot is recorded.

Rigid plates which can accidentally turn edge-on or sideways when hit are expressly prohibited. Using them may result in the withdrawal of IPSC sanction (see Rule 4.3.1.1).
