7.	The use of a bipod and barricade stops permitted	Yes	No	Yes	Yes
8.	Vertical front grip permitted, max length 152mm (6 inches) from the centerline of the barrel	Not applicable	Yes	Not applicable	Not applicable

Special conditions:

9. Manual Action is defined as a firearm that can discharge a single round each time the trigger is pulled, but after discharging a round requires the competitor's physical action to manually prepare the firearm for a new discharge by extracting and ejecting the empty cartridge case, recocking the action and chambering a new round. If any of these steps are performed other than by the competitor's physical action, the firearm does not qualify as Manual Action. Firearms that do not qualify as Manual Action may be used in the Semi Auto Divisions subject to them complying with any applicable Division requirements.

Spring assisted chambering operations in Manual Action Contemporary Division is permitted, provided the energy conversion to the spring has been made by the competitor's physical action after the Start Signal.

Bolt Action is defined as a firearm in which the opening and closing of the breech is performed via the manual operation of the bolt by the competitor, using a handle directly attached to it.

10. Measuring the length of the compensator/flash suppressor is done from the end of the rifling to the tip of the device.
11. Only one bipod, with a maximum extended length of 90 cm (35.5 inches) from the centerline of the barrel, is permitted per course of fire. Bipods may be removed during a course of fire and changed between courses of fire.

Manual Action Contemporary Division

12. This Division is under evaluation and, unless extended, it will expire on 31 December 2025.
