

APPENDIX E4b: Barrel Length Measurement Protocol

A fully assembled and unloaded handgun is pointed vertically skywards, then a dowel with a 127 mm marker is inserted into the muzzle end of the barrel until the dowel rests on the breech face. If the 127 mm marker is at or beyond the muzzle end of the barrel, the handgun is compliant for Production Division.

For revolvers, measure from the muzzle end of the barrel to the face of the forcing cone where the barrel ends. If the length is 127 mm or less, the revolver is compliant for Production Division.
